MASTER- SHIP in Digital Orthodontics

International 1-Year Blended Program

PROGRAM AIM

The Mastership of Digital Orthodontics aims to empower orthodontic specialists and residents with comprehensive knowledge and hands-on expertise in:

- Advanced digital orthodontic treatment planning and execution
- Integration of intraoral scanning and 3D imaging technologies
- Clear aligner therapy systems and digital workflow optimization
- Virtual treatment simulation and outcome prediction
- Evidence-based digital orthodontic protocols
- Practice management and patient communication strategies

FORMAT

- Live interactive workshops
- Hands-on clinical training
- Case-based discussions

WHY JOIN?

- Build confidence in digital workflows
- Learn through real cases
- Gain international exposure
